Classroom Management

Dr. Lamb

### CM Philosophy

My classroom philosophy is based upon Wong. My class will be centered around procedures because I will be teaching gym class. Having my students follow procedures will help them get the most out of my class while having fun in the process. I will also create a respectful environment where the students and myself can have a professional relationship. I will make sure that they feel welcome and get to know them on a personal level. Creating this type of atmosphere will help the procedures run smoothly. I believe it is important to have respect for everyone involved in the classroom in order to have a successful experience. I will build a foundation that students, parents, and colleagues can feel safe in while expressing themselves freely.
